

August 30 – September 2 • ARIA CityCenter™ Resort • Las Vegas, NV, USA

Intergraph 2010 Process, Power & Marine Session Topics

Join other process, power, and marine thought leaders from around the world at Intergraph 2010, our annual users' conference to be held this year in Las Vegas, Nevada, USA, August 30 – September 2, at the ARIA CityCenter™ Resort. Learn about Intergraph's latest technology and solution advancements and how to apply them to your everyday, real-world situations.

Benefit from an Industry Perspective

Discover how Intergraph can help you seize the world of opportunities available to your organization. Gain perspective on what is occurring globally in the process, power, and marine markets. Topics featured at the conference include:

- 3D and Process Design
- Construction and WorkFace Planning
- Control Systems
- I&E Engineering Cost Savings
- Electrical Design Enhancements
- Enterprise Tools Integration
- Integrated Engineering for Bulk Materials Handling Projects
- Piping Design Analysis
- Plant Telecommunications
- Site-based Engineering Workflows for Design, Operations, and Maintenance
- Structural Solutions
- Plus, various sessions featuring real-world customer examples!

Please note that this is a preliminary list and is subject to change.

Conference Searchable Agenda Now Available Online
