

August 30 – September 2 • ARIA CityCenter™ Resort • Las Vegas, NV, USA

Intergraph 2010 Utilities & Communications Session Topics

Join other utilities and communications thought leaders from around the world at Intergraph 2010, our annual users' conference to be held this year in Las Vegas, Nevada, USA, August 30 – September 2, at the ARIA CityCenter™ Resort. Learn about Intergraph's latest technology and solution advancements and how to apply them to your everyday, real-world situations.

Benefit from an Industry Perspective

Discover how Intergraph can help you seize the world of opportunities available to your organization. Gain perspective on the latest technologies available to utilities and communications organizations. Topics featured at the conference include:

- Data Visualization Techniques
- Distribution Integrity Management Program
- Integrating and Enhancing Your Enterprise Operations
- Field Automation
- Geospatial Multi-Utility Infrastructure Management
- Leak Management
- Smart Grid Command and Control
- Vegetation Management
- Series of Hands-on G/Technology Technical Sessions
- Plus, various sessions featuring real-world customer examples!

Please note that this is a preliminary list and is subject to change.

Conference Searchable Agenda Now Available Online
